

V*A*e is a Service-Disabled Veteran-Owned Small Business (SDVOSB) committed to providing our customers with highly trusted and reliable services.

Electronics Training and Certification Program

- Who:** Veterans who wish to pursue a career in the rapidly growing electronic manufacturing service (EMS) sector. No prior experience in electronics is needed, just the desire to learn.
- What:** Extensive 6 week electronics training and certification program with no cost to the Veteran.
- When:** Courses run throughout the year.
- Where:** Fremont, California. Future sites to be determined based on demand.
- Why:** V*A*e is a company founded and run by veterans. We understand the importance of providing reliable electronics to the warfighter. With the United States experiencing increased technological competition throughout the world, it is vital now more than ever to provide highly skilled personnel to our workforce who understands problem solving and rapid solution implementation.
- Details:** During the 6-week program, you will receive extensive knowledge and hands-on training, earning all 5 electronics manufacturing certifications provided by the IPC (Institute for Printed Circuits). This provides a tremendous job-seeking advantage. Courses include:

- ★ IPC-A-600G Acceptability of Printed Boards
- ★ IPC-A-610D Acceptability of Electronic Assemblies
- ★ IPC/WHMA-A-620 Cable and Harness Assemblies
- ★ IPC 7711/7721 Rework of Electronic Assemblies and Repair and Modification of Printed Boards and Assemblies
- ★ ANSI/J-STD-001 Soldered Electrical & Electronic Assembly
